DETOXIFICATION:

Take Detoxification to the next level with:

“THE FATRIX”

An Alternate Lipid Universe

“The Fatrix” is an advanced detoxification seminar which takes detoxification to the next level: The Cell Membrane. This seminar provides a paradigm-shifting view of the cell membrane, its component fatty acids and the lipophilic toxins which embed within the cell membrane. “The Fatrix” provides new insights into the effective removal of chemicals, toxicants and heavy metals bioaccumulated within the lipid cell membrane.

Linnette M. Beck

AP, DOM, Dipl.Ac. (NCCAOM), Di.Hom., CAP

XYMOGEN EDUCATIONAL XPERIENCE

This seminar is a paradigm shift

“The Fatrix” is NOT a weight-loss seminar.

“The Fatrix” is a seminar packed full of published nutritional biochemical research that is not yet being discussed in other functional medicine forums. The Fatrix will dramatically impact the way you identify, mobilize and detoxify lipophilic toxins, with special emphasis on improving your patients’ neurological and mental function.

Why?

Do you see toxic patients in your practice? Have you ever wondered why some patients can carry such a high toxic load with few symptoms while others with a less toxic load present with more severe symptoms? Do you conduct genetic detox profiles and fail to find the underlying cause for the patient’s vulnerability to neuro-toxins? Have you found out-of-control oxidative stress in your patients which fails to respond to mega-dosing of antioxidants? Have you ever had a patient develop mental / neurological symptoms while they were going through detox? Have you ever noticed that vegans can present with some of the worst and most persistent neurological symptoms? Have you ever wondered if the emotional symptoms you were seeing in patients might actually be neuro-toxin related? If you answered yes to any of these questions, then you need to attend this seminar in order to understand the vital role lipids play in detoxification and healing.

Successful detoxification is more complex and subtle from biochemical and energetic perspectives than just considering Phase I/II genome and nutritional detoxification, although these topics form a strong underpinning. In this one day, fast-paced seminar Linnette will provide an overview of the information needed to safely and successfully detoxify your patients (with special emphasis on the neurologically ill). The breadth of information discussed may cause you to look at detoxification in a new way. today's environment.

Linnette M. Beck provides solutions to chronic health issues in Florida, specializing in biochemistry and functional medicine. Inspired by her globally board certified Applied Functional Medicine training from the Shanghai University of Traditional Chinese Medicine in Miami, Florida. She has extensive training in toxicology, functional medicine, and integrative training, she holds a Ph.D. (1986) and M.S. in various medical topics.

Shift in the field of detoxification

Clinical Takeaways

- Understand cell membrane dualism and the lipid paradigm shift
- Understand why fatty acid supplementation is far more complex and needs to be more individualized than you may have been previously lead to believe
- Understand how to identify and treat the neuro-toxic patient
- Learn why mental and neurological illnesses may share a common physiological basis
- Understand when to and when not to implement aggressive deep detox treatments
- Understand the Syndrome X connection to detoxification and neuro health
- Learn about genetic polymorphisms beyond liver detoxification that dramatically impact neuro-toxic conditions
- Learn why High HDL may not be a good sign.
- Learn how to safely detoxify the hypersensitive patient
- Learn a simple test to help you baseline and monitor neuro conditions
- Learn why all fatty acid lab tests are not alike
- Understand methylation and homocysteine beyond traditional cardio concerns
- Be introduced to “The Fatrix’s” next level of advanced lipophilic toxin mobilization and clearance utilizing IV therapy.

What others have to say about “The Fatrix”!

“Rarely are we gifted with a PARADIGM shift in nutritional medicine. Linnette Beck has just done it! Synthesizing the principles of physical chemistry, biochemistry, physiology, anatomy and nutrition, Linnette has given us a clinically relevant understand of the Beta-Oxidizer Neurological Syndrome by opening are minds to “THE FATRIX”

Jack E. Young, MD, MD(H), NMD, PhD

“Dr. Beck has a passion and a vision for the frontier of health that exists at the bi-layered cell membrane. The frontier of health and healing exists at the cell membrane and the normalization of its structure and function. Dr. Beck loves and lives at the cell membrane and conveyed to me the information I need to be a more effective physician for neurological healing.”

George Moon, DC

AP, DOM, Dipl.Ac. (NCCAOM), Di.Hom., CAP is a primary care physician focused on finding root-cause illness in her patients. She has a busy practice at the Beck Natural Medicine Center in Melbourne, FL, specializing in toxin-induced syndromes. Linnette implements therapies based on leading-edge research in biophysics. Her insatiable passion with the topic of detoxification has spanned over 13 years, initially from her own life-threatening neurological illness. A licensed Acupuncture Physician in Florida, Linnette is nationally recognized as a Diplomate in Acupuncture (NCCAOM), and is a graduate of the Institute of Functional Medicine's Clinical Medicine in Clinical Practice Program (AFMCP). She received her Acupuncture Physician diploma from the Institute of Chinese Medicine (1995) and her Oriental Medical Doctorate from the Open International College of Complementary Medicine (1997) through her graduation from the Acupuncture-Acupressure Institute in Florida. She holds numerous certifications in Acupuncture, German biological medicine, homeopathy, homotoxicology, electro-dermal screening (EDS/EAV), and addictionology. In addition to her medical-related degrees, she holds a B.S. in Business Administration from the University of Illinois (Urbana-Champaign) (1984), a MBA from the University of Florida (1989) from Florida Institute of Technology. She spends much of her free time studying
